1. References:

- a. Disposition Form, DAPE-MBU, 11 March 1983, subject as above (Incl 1.)
- b. Executive Order 12333, United States Intelligence Activities, dated 4 December 1981, paragraph 1.5 (n).

2. A draft revision of Army Regulation (AR) 570-3 "The Manpower Utilization and Expense Reporting System (MUERS)" is currently being reviewed by the Army Staff prior to publication. The AR supersedes AR 570-3, dated 22 March 1971, and is being completely republished. The revised regulation proposes to eliminate some of the manpower and workload data required by the current AR, and generally reduces the frequency of reporting of manpower utilization and expense data.

3. MUERS, if approved, will be the only detailed automated data base which will provide civilian manpower utilization and expense data and military non-MTOE (i.e., TDA/JTD, Augmentation TDA) operating strength utilization data. MUERS will be the only system available to build the "Actual" column of the DCI, OSD and President's Budget and to respond to Congressional questions on the budget. So that we can provide a coordinated Community position pursuant to Intelligence Community responsibilities in reference 1b, we request you review the draft regulation and give us your comments primarily with respect to the following:

- a. The types of data to be reported vis-a-vis data requirements for budget formulation and defense before OSD, OMB, DCI, and Congress.
- b. Frequency and timing of reporting under MUERS in relation to PPBES major milestones, for example, President's Budget, GDIP program formulation.
- c. Other budget or management information needs for manpower data not addressed by MUERS and not otherwise available.

System (MUERS)

4. Your comments and recommendations on the above areas, and any other suggestions you might have for improvement of the regulation, are requested as soon as possible, but not later than 6 April 1983.
